DORY

DORY'S WITH STYLE

# Orkney 315

This neat and roomy Dory is equally at home taking your crew to the harbour mooring or to the top of the creek to fish.

It could nestle in your davits en-route to foreign shores or speed to the beach for the youngsters to ski.

Smart tender or racey trailabout, the Orkney 315 is safe and stable, exciting and exhilarating, yet so easy to handle. If you have children on board, beware. You may never get to drive it yourself.

# Orkney 424

If you take the family and friends to that quiet bay around the headland, or if the boys want to go skiing or diving along the coast, the Orkney 424 is the one for you.

If you need a fast and stable boat for sailing club rescue or harbour patrol, the highly manoeuvrable Orkney 424 fills the berth.

For trailable versatility and sports boat style, the custom trim versions bring a touch of luxury to the inherent dory seaworthiness. The positive mechanical steering and high quality fittings make the 424 a pleasure to handle and a joy to own.

# Orkney 475

A rugged dory, largest of the Orkney range, ideal if you fish offshore or move heavy loads across the loch. The Orkney 475 is a deep sided, multi-role working sports boat with all the usual dory features and more.

In standard form with forward console and side benches you have a spacious personnel carrier. With custom trim and 85 hp you have high performance and comfort - ORKNEY STYLE.

A BETTER DORY

# Orkney

STYLE

Choosing a boat is a responsibility, so choose wisely - Choose Orkney.

Orkney Dorys have given years of good service to Clubs, Local Authorities, H.M. Customs, Rescue organisations, Police and Harbour Authorities as well as discerning private owners.

We at Orkney are always looking for ways to build a better Dory and, along with our dealers, we are always pleased to quote for boat equipment for special duties.

## Design

Over 25 years of boat building experience can be seen in our Naval Architect designed hulls. Pronounced "V" forward sections for soft rides, spray rails for dry rides and deep topsides for safe rides. Orkney Dorys feature a central drain channel or "bilge" from which any water between the double skin is drained away. Open the transom drain and self-bail as you speed along. Closed cell polyurethane foam is used for buoyancy but we place it where it will be most effective.

## Construction

Only hand laminated G.R.P. is used in our boats. Each deck is "wet" bonded to its hull, not only round

the gunwale but also below the floor. This makes a tough and rigid structure even before the polyurethane foam is injected. Orkney combines the strength of an integral chassis with the unsinkable safety of sandwich construction.

## Features

Accessories are an important part of any Dory and the way these fit and function has always been of prime importance to us. Trailers, canopies, covers, rails and upholstered seating - all these are purpose designed and made to enhance your Orkney Dory. Details which matter to the user are given the closest attention and it is the way we treat the finishing touches that set Orkney Dorys apart. It's the way we fix items like the fender and the way we provide stowage in the steering console. It's the fitting of the canopy and the stripes on the hull. . . . It's ORKNEY STYLE.

## Value

Check our specification, check our prices, check our reputation, then set course for better value and buy - ORKNEY STYLE.

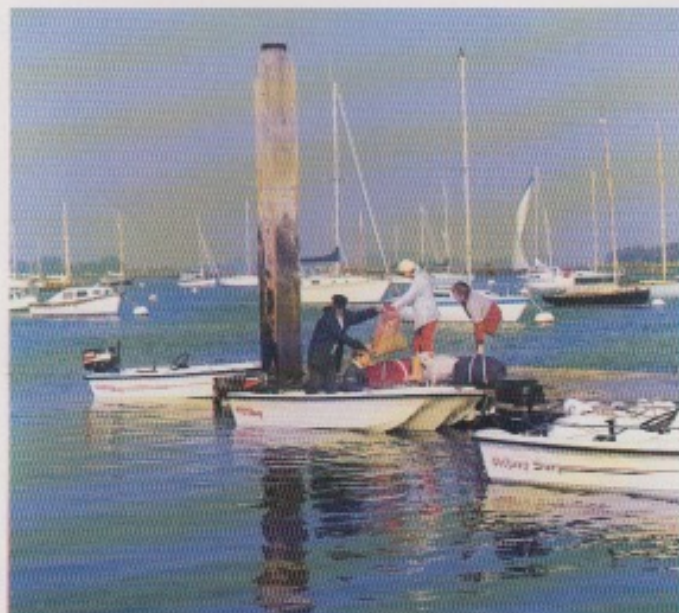

Orkney 315

Orkney 424

Orkney 475

Length	Beam	Weight	Power
10'4" (3.15m)	5'2" (1.57m)	250lb (113kg)	2-25HP long shaft
14'0" (4.24m)	5'11" (1.8m)	450lb (204kg)	10-50HP long shaft
15'5" (4.7m)	6'11" (2.1m)	800lb (363kg)	20-85HP long shaft (single or twin)
