FISHING BOATS

Even if you do not have to rely on your boat for your livelihood, it's reassuring to know its pedigree.

The waters around the Orkneys are often dangerous and the currents between the islands run fast. As there are few harbours and mooring is unsafe the boats need to be light enough to launch and yet strong enough to take the seas.

Our original designs were built by this yardstick: light and strong, trailerable, safe and seaworthy.

The same is true today making the present Orkney Fishing Boat range - **Quite Simply the Best.**

Orkney

FISHING BOATS

The Orkney Fishing Boat range – *built to last*. Simple no nonsense construction makes our boats tough and durable, easy to maintain and simple to repair. Standard specification includes: heavy duty hulls in hand lay-up GRP • galvanised keel bands on all models • anodised alloy deck fittings • tough all-round fendering and stainless steel winch eyes. Smaller and medium sized models feature built-in buoyancy as standard and the larger boats have self-bailing cockpits.

With twelve models in the range from 11-23 ft and a good range of optional extras there is an Orkney boat to suit most needs.
